AMOGHA K. J

Data Analyst | SQL • Excel • Python (Pandas/NumPy) • Data Visualization

Shimoga, Karnataka, India | amoghakj07@gmail.com | +91 7483993797 | linkedin.com/in/amoghakj

PROFESSIONAL SUMMARY

Computer Science undergraduate with hands-on experience in SQL, data validation, and backend systems from internships and industry job simulations. Comfortable collecting, cleaning, and querying structured data, and turning raw datasets into working reports. Quick to learn new analytics tools, with strong attention to detail and a track record of measurable process improvements in Agile teams.

CORE SKILLS FOR DATA ANALYSIS

Data & Analytics: SQL (queries, joins, validation), Data Cleaning & Organization, Python (Pandas, NumPy — basics), Statistics fundamentals, Excel (formulas, pivot tables, charts)

Reporting & Tools: Dashboards & performance reporting, Google Sheets, Microsoft Office, Git, Agile/Scrum

Programming & Systems: Java, Python, JavaScript, Spring Boot, REST APIs, Apache Kafka, H2 / SQL databases

Cloud & Version Control: AWS (basics), Git, Maven

EXPERIENCE

Software Development Intern *Dec 2024 – Apr 2025*
Emberquest *Bangalore, India*

- Queried and worked with SQL databases to support application features, gaining exposure to structured data handling and cloud-based system design.
- Analyzed application usage and performance data to guide optimizations, reducing page load times by 15%.
- Built and maintained web features using React JS and JavaScript, improving user engagement by 20%.
- Collaborated in Agile teams and used sprint data to improve delivery efficiency by 25%; applied data-driven debugging practices that cut debugging time by 30%.

Software Engineering Job Simulation — JPMorganChase (Forage) *Jan 2026*
Forage *Remote*

- Modeled and validated transaction data using Spring Data JPA and an H2 SQL database, including entity design and balance reconciliation across relational records.
- Consumed and validated high-volume transaction datasets from Apache Kafka topics, ensuring accuracy and consistency before persistence.
- Built RESTful endpoints to query and return user balance data as structured JSON, and verified data integrity using Maven test suites and debugger-driven inspection.

PROJECTS

Full-Stack Web Application with Secure Authentication

- Built a full-stack application using React JS, JavaScript, and SQL, including data storage and retrieval logic.
- Implemented secure authentication/authorization and applied performance optimizations for responsiveness and reliability.
- Used Git for version control and followed Agile development practices throughout.

EDUCATION

Bachelor of Technology (B.Tech) — Computer Science & Engineering *Expected 2028*
CMR University, Bengaluru, Karnataka

Diploma in Computer Science & Engineering *Completed May 2025*
DVS Polytechnic (Govt. Aided), Shivamogga, Karnataka

Secondary School *Completed Apr 2022*
Sri Ramakrishna Vidyalaya, Hosanagara, Karnataka

CERTIFICATIONS

- Introduction to Generative AI — Google
- Fundamentals of Data Structures in C

ADDITIONAL STRENGTHS

- Strong analytical and problem-solving skills, with attention to detail and data accuracy
- Quick learner, adaptable to new analytics tools and technologies
- Effective communication and collaboration in cross-functional, Agile teams
